PIPETTE RESERVOIRS

Designed To Save You Money and Space

PIPETTE RESERVOIRS

INTEGRA reservoirs have been designed to nest inside each other, making it possible to get twice as many reservoirs in half the space of other products on the market, reducing inventory space requirements and shipping costs. Unlike traditional reservoirs that have hard to see graduations molded directly into the plastic, INTEGRA reservoirs are made of crystal clear polystyrene and fit into a reusable base with bold, crisp, clearly visible graduation markings. The unique design leads to more accurate reagent measurements, no over pouring, and less waste.

Clear Graduations

Patented design refracts light so graduations below fluid become invisible, making it easier to identify the exact desired volume line.

Innovative Packaging Options

Clearly designed to nest within one another without sticking, INTEGRA reagent reservoirs come in compact, space-saving packages (containing portable, standalone sleeves ideal for lab benches or hoods).

Reusable Reservoir Base

Holds disposable reservoir securely during use. One free base is included with every case of bulk or individually sealed reservoirs.

Pour Back Spouts

Molded into each reagent reservoir, convenient pour back spouts control liquid flow and allow you to neatly and easily return excess fluid to a source container, if your protocol allows.

Inserts Are Lids

Base accommodates two reservoirs; one acting as a lid, to allow short term storage of reagent on a benchtop while preventing evaporation or contamination from particulates.

Deep Trough Design

For maximum fluid recovery and minimal waste, INTEGRA reagent reservoirs feature a full length, extra deep trough that is more easily accessible for pipet tips.

Ordering Information

Volume		Part No.
10 mL	Sterile, individually sealed, 30 reservoirs per case (for use with 8 and 16 channel pipettes)	4331
	Sterile, four sleeves of 50 reservoirs per case (for use with 8 and 16 channel pipettes)	4332
	Reservoir base, 10 pack (for use with 8 and 16 channel pipettes)	4306
25 mL	Sterile, individually sealed, 30 reservoirs per case	4311
	Sterile, four sleeves of 50 reservoirs per case	4312
	Reservoir base, 10 pack	4304
100 mL	Sterile, individually sealed, 30 reservoirs per case	4321
	Sterile, four sleeves of 50 reservoirs per case	4322
	Reservoir base, 10 pack	4305
